## Detailed Action

### Response to Amendment

1. Applicant's request for reconsideration of the rejection of 35 U.S.C. 102 of the last Office action in regard to claims 1, 11 and 21 of the instant application is persuasive and, therefore, the finality of that action is withdrawn.

Further, the rejection of 35 U.S.C. 103 in regard to claims 6, 7, 14, 26 and 27 is withdrawn in light of the argument presented and the recommended amendment to claims 1, 11 and 21.

### Allowance

2. Claims 1-30 are allowed. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 11 and 21: *Hamada et al.* (IEEE Article, 'A High-Speed Boundary Search SHMOO Plot for ULSI Memories', hereafter *Hamada*) teaches a method of testing operational boundaries (see *Hamada*, Introduction). The method includes:

- Discovering an operational range over a plurality of varying operating parameters for a device by testing points as defined by the plurality of varying operating parameters (see *Hamada*, Figs 1, 6 and page 5, section 2-1);

- Discovering an operational boundary of the device that includes a plurality of boundary points just outside of the operational range without testing all the plurality of interior operational points (see Hamada, Figs. 9 and 11, page 8, paragraphs 2 and 3).

The claimed invention provides all the features noted in Hamada, but unlike Hamada, the claimed invention carries out the test from a known interior operational single point when fully testing the device to discover adjacently coupled boundary points that define the operational boundary.

The remaining claims are dependent upon claims 1, 11 and 21 and contain further limitations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
